-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicants' cooperations are requested in correcting any errors of which applicants may become aware in the specification.

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required. [The abstract in the PCT does not suffice].

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a), In claim 1, reciting ---horizontally-- in lieu of "a generally horizontal attitude" is better. Also the term "as such" in claims 1-2 should be deleted as being superfluous.

b). The claimed "adapted to" in claims 10-12 fails to ascertain the claimed invention with precision. It is unclear, for example, if the temperature sensing means do in fact measure the temperature of the chamber with the "adapted to" recitation,

c). Claim 6 recites the limitation "the rotor axis" and "the central point of the sensor"

There are insufficient antecedent bases for these limitations in the claim.

d). Claim 4 reciting "the size of the sensor is such that it can be considered to be a point source /detector" is ambiguous. (Underlining supplied).

e). The inconsistent used of terminology in the claims such as: "the pyrometer sensor" in claim 3, line 2, as opposed to "pyrometer components" in claim 1, second line from the bottom provides for confusion.

f). The terms "the said" in claim 5, last line is redundant.

Claims 4-5 are objected to because of the following reasons:

a). The used of a slash such as " point source/detector " in claim 4 is improper.

b). Note typographical error such as "centre" in claim 4, last line which should be – center—as the latter is the term normally used in the U.S.

Claims 1-13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a). Markham discloses a high speed radiation thermometer having an IR measurement.

b). Guy et al '533 and Guy et al '133 disclose a centrifugal evaporator that allows pivoting of a cover and heating by a heating resistor respectively.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to V. Manoharan whose telephone number is (571) 272-1450.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444.
